

Care and
Hospital

Whiteboard with own print

- + Wear-resistant print, even during daily intensive use
- + Magnetic surface

smit-visual.com

SMIT VISUAL

We make

In healthcare environments, whiteboards with specific prints are an important means of communication. Care workers are, almost by definition, professionals who do not sit at a computer for a long period of time. A whiteboard with permanent print ensures that information can be added in a clear, comprehensive way. It ensures the information is visible right away to those who need to know.

"We want a board with the patient's details by every bed"

"Making information about our department visual for clients"

"We want to better coordinate care appointments"

it visible

For professional use

Smit Visual printed whiteboards are especially made for daily intensive use and a long lifespan. The print is embedded in the whiteboard surface instead of being added on top. 1 year product warranty. For a correct maintenance, always only use Smit Visual whiteboard markers and cleaning spray.

+ Scratch-proof print

+ Print does not fade

+ Full-colour print
with deep colours

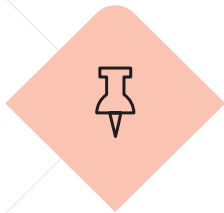

+ Magnetic surface

From small to very large

Prints do not always fit on a board of 60×90 cm, and sometimes not even on a board of 100×200 cm. That is why we offer boards up to a maximum of 120×300 cm

Overig:

Every care institution, department or team has their own take on specific work processes. The target group of the board may vary: children/adults, patient/staff, etc. This means that often, the standard planning board does not precisely fit the needs in question. The solution is a personalised design with custom layout and looks.
