Projection boards ExtraFlat

The ExtraFlat profile is much used in schools. The frame can be combined with a lightweight core, allowing mounting on height-adjustable structures such as columns. ExtraFlat boards are supplied as standard with a pen/chalk tray along the entire width of the board.

Projection boards ExtraFlat

Winged projection boards are lightweight, allowing them to be mounted on columns (see from page 98).
These boards can have recesses in them for touch sensor modules. The wings can then still be folded away completely. The grey strip on the board is the area where the module can be installed.
